# Essential Reading Overview

- Clark, Golder, and Golder outline the types of dictatorship, the dictator's dilemma, and the two problems that authoritarians face, as well as the all-important selectorate theory.
- Gandhi and Przeworski argue that a dictator must calibrate the number of parties in their legislature to the threats that they face in order to protect their regime.

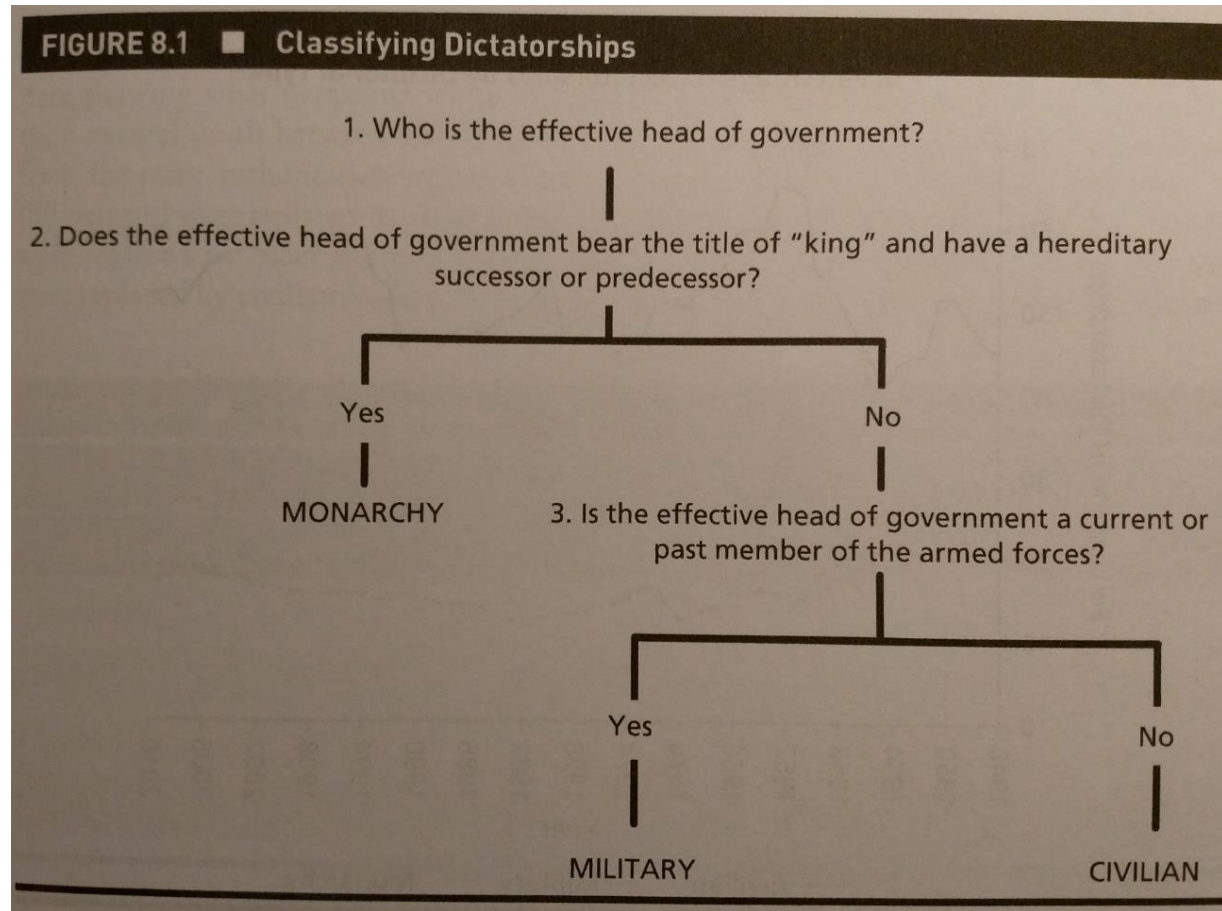

# Real-World Example

## *Morocco's King Pardons Journalist Sentenced on Abortion Charge*

The journalist, Hajar Raissouni, was arrested with her fiancé as they were leaving a gynecologist's office in the capital last August.
