# Very Quick Recap

- ⊙ Calculating a correlation:

$$r_{xy} = \frac{\sum z_x z_y}{N}$$

- ⊙ Equation for a straight line:

$$Y = a + bX$$

- ⊙ b, Beta, and R<sup>2</sup>.

# Commands and Handout

- ◎ This week we'll use:
  - pwcorr, regress, twoway
  - sig, obs, (scatter) (lfit)
- ◎ The handout's quite long this week but it'd still be worth reading unless you're desperate to skip to the exercise
